FLOW 01 · ONBOARDING & ELIGIBILITY

Unified Onboarding Master Flow Board

Every screen, decision, branch, retry and outcome of the implemented onboarding — left to right. Screens are the live prototype independently; journeys are derived by tracing the real journey engine. Synthetic data only.

24 screen nodes · **9** decision points · **20** decisions · **101** connections · **24** end flows

LEGEND

- User-facing screen (live shell/card)
- External integration (open / simulated)
- Hands-on-keys
- Retry loop
- Business decision
- Manual review / flag
- Connector (under the hood)
- Permitted step-back
- System operation
- Final outcome
- Condition

How to read: start at **BIR** (new applicant) or **BIR** (returning). The flow splits after the category decision into Path A (Registered Business) and Path B (Freelancer). Applications leaving self-onboarding drop into the manual review lane; auto-ends in an outcome.

ENGINEERING & DATA REFERENCE — FOR CONTRIBUTOR BUSINESS RULES

- **B-01 Category selection** — Business or Freelancer; drives the entire downstream path.
- **B-02 CR required (path)** — Path A only; unlocked by a monthly subscription (or small allowance) before reaching a live application.
